

I Public neurites: OpenHCS and published NeuronCyto II

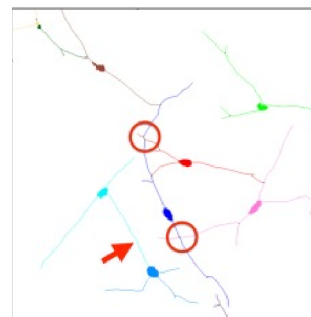

A Raw detail

B OpenHCS initial detail

C Published NeuronCyto II

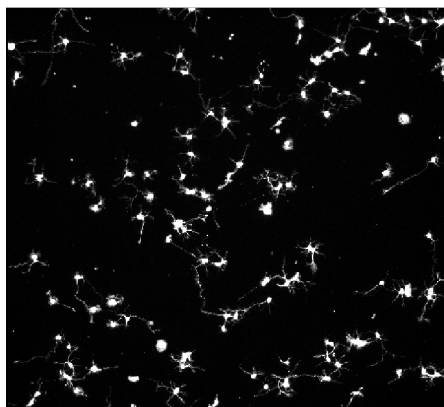

Whole field • algorithm, not manual GT

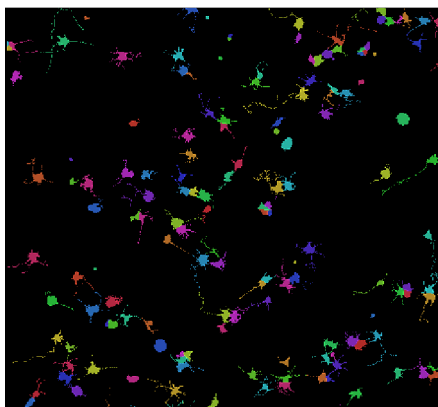

A-B: retained shaft detail. C: Ong et al., Fig. 2D; attribution CC BY-NC 4.0.

II Laboratory neurites: final autonomous analysis

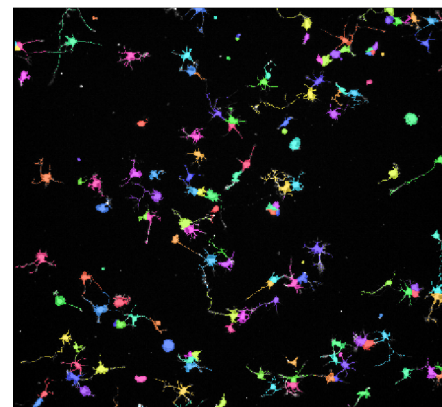

D Raw FITC

E Body and path result

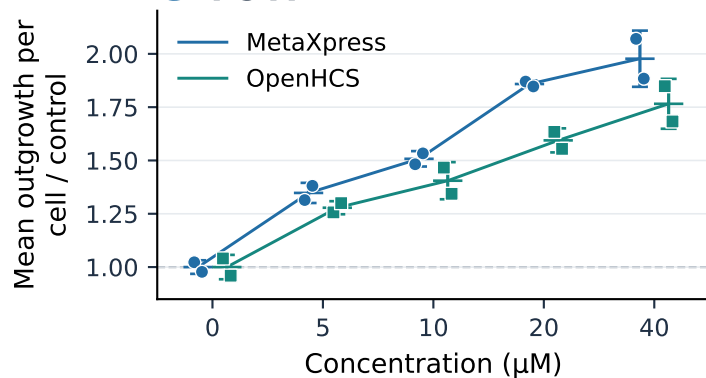

F Combined

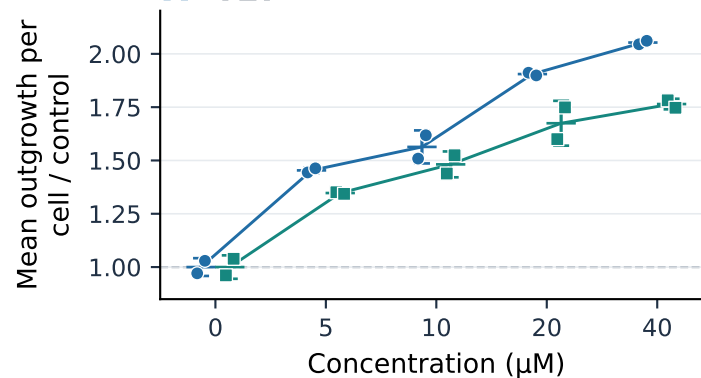

III Assisted repair: treatment responses

G FC-A

H Y27

Twenty matched wells; two technical wells per dose. Concordant outgrowth responses; branching fold changes differ.
