

II Main window with enlarged native details

The screenshot displays the OpenHCSUI main window with several panels and overlays. The top panel is the **System Monitor**, which includes system information and two graphs. The **Plate Manager** and **Pipeline Editor** panels are visible below. The **Execution-server browser** panel is at the bottom left. The **Plate Manager** and **Pipeline Editor** panels have blue dashed arrows pointing to their respective enlarged insets. The **Execution-server browser** panel has a blue dashed arrow pointing to its enlarged inset. The **System Monitor** panel shows system information and two graphs. The **Plate Manager** panel shows a list of plates and their details. The **Pipeline Editor** panel shows a list of pipelines and their details. The **Execution-server browser** panel shows a table of execution servers and their status.
