

Measurement-first autonomous 3D localisation

A XY: saved nuclear ROIs + raw

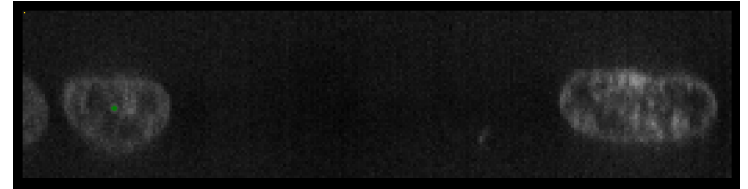

XY: same-run nuclear ROI extents, not validated cell borders.
XZ/YZ: original centres; out-of-plane points are hidden.

B XZ: ordinary-body centre

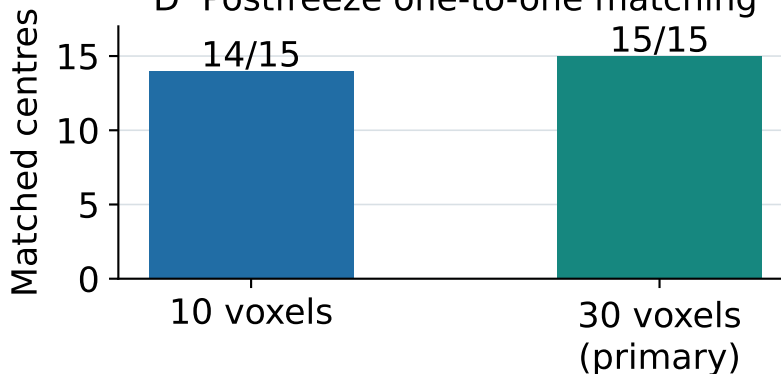

Y = 157 voxels

C YZ: ordinary-body centre

X = 80 voxels

D Postfreeze one-to-one matching

26 candidate centres

Mean matched error: 4.80 voxels

11 predictions unmatched to annotations

Annotation completeness is unestablished;
unmatched does not mean biologically false
