

A Bright objects

Same image · computational reference

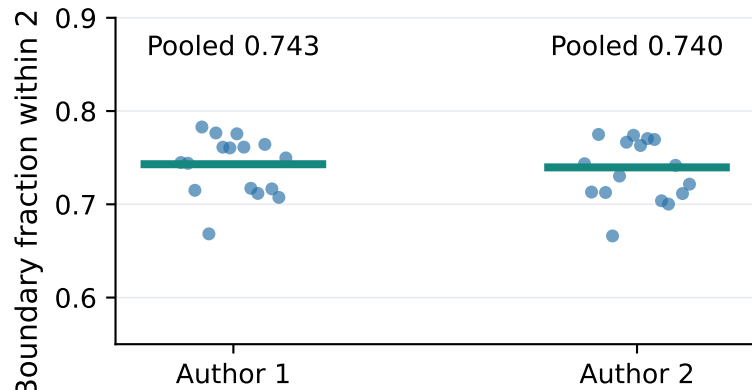

B Independent nuclear analyses

Three authors · independent instance annotations

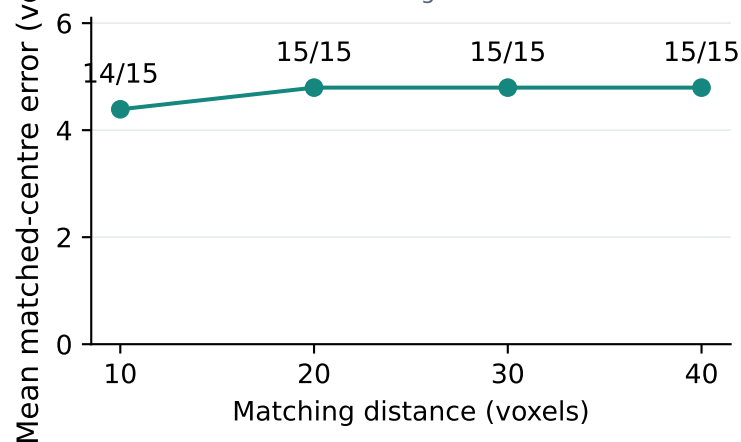

C DNA / actin cell boundaries

16 fields each · manual-outline union

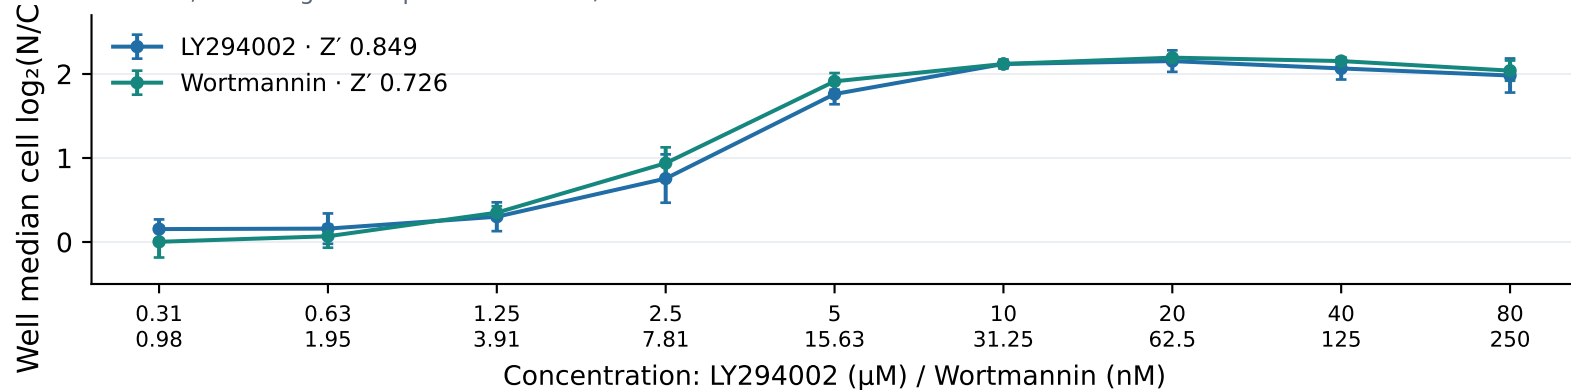

D Three-dimensional centres

15 manual centres · coverage not exhaustive

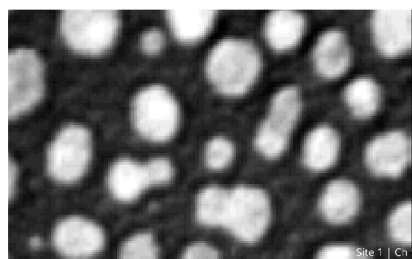

E Protein translocation

96 wells, including development · 4 wells / dose

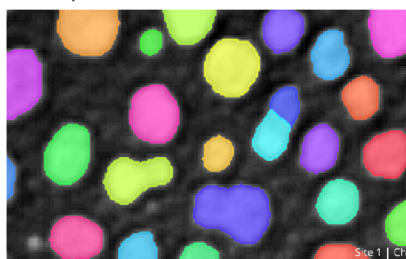

F Nuclear repair on the same input: raw → first → final

Raw

First, a01

Final, a04
